DETAILED ACTION

Allowable Subject Matter

Claims 21, 44 and 50-53 are allowed.

This application is in condition for allowance except for the following formal matters:

The application contains disclosure entirely outside the bounds of the claims. Applicant is required to modify the brief summary of the invention and restrict the descriptive matter so as to be in harmony with the claims (MPEP § 1302.01).

The examiner notes that applicants appear to have misunderstood this requirement. The requirement to modify the disclosure is not limited to amendment of the brief description of the invention, but applies to the entirety of the specification, the “descriptive matter”. As noted in MPEP 1302.01, the original description of an invention is frequently of much greater scope than the allowed claims. In the instant application, the disclosure of the invention describes the discovery through bioinformatics of many thousands of individual VGAM genes, while the allowed claims are directed to one; therefore applicants are required to amend the disclosure to restrict it to material that relates to the subject matter embraced by the claims.

Conclusion

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
